A zip file which includes kml (google earth) and gpx (garmin) files of the sites to be potentially assessed can be downloaded [here](#). Georeferenced pdf maps can be accessed and downloaded [here](#).

Accommodations

AI - Silverthorne RV park is located between Finning and the Sullivan Chevy dealership on the west side of town. The address is 1700 highway 16 but you could also type in Alix place which should bring you to the driveway as well. Contact Lance - 1 604 556 9903 - email:

399hffibdi8v4u8b70ax17dv3oy@reply.airbnb.com

Kyle, Tiesha - Sunshine Inn Houston. - Contact 250-845-7867, email: houston@sunshineinn.ca

Vehicles

AI - 2013 Toyota Tundra black w/flatdeck and yellow can-am quad

Kyle - 2009? Chevy Sierra silver w/ canopy and graphic of two massive wolves in back window

Dallas - Nico Ridge - Witset - 2021 chev Silverado. 4x4 truck

Equipment Checklists

Personal Equipment Checklist	•
GPS	food
Sunscreen	gloves work
Bugspray	glasses safety
Polarized glasses	headlamp
Bear Spray	hard hat
phone/camera	steel toed boots
battery pack booster for phone	clinometer
Hat	field vest

first aid kit personal	note book
Waders	Extra clothes
Boots	rain gear
Ski poles	hand lens
water	—

Crew Equipment Checklist	•
Hand saw	pilon x 2
Linesman Gloves x 3	Measuring board
Backroads Mapbook	Scale
Locational maps	Permits
Background Documents	Fish ID book
radio road	Site Cards / Field Guide
Inreach	Minnow Traps
Field Safety Plan	Catfood
first aid kit level 1	Flagging
First Aid binder stocked	Laptop w/basecamp
Throw bags	GPS cable
polaski	Lazer level
shovel	Assessment cards fish passage
fire extinguisher backpack	UAV
fire extinguisher pressurized	Flow meter
Battery booster	ATV
Compressor 12V	bucket rigid x 2
Rubber boots (no-slip soles)	bucket foldable
Small BT Speaker (for bears)	clove oil kit w/ instructions
Oakton Multimeter	gloves leather
Backpack Electrofisher	sharpies
stop nets x 4	ATV gas
salt blocks	ATV lock
loose salt	UAV battery charger
dip nets x 2	wader disinfectant kit

tape measure hand GPS batteries

tape measure eslon ATV helmets

Nearest Hospitals

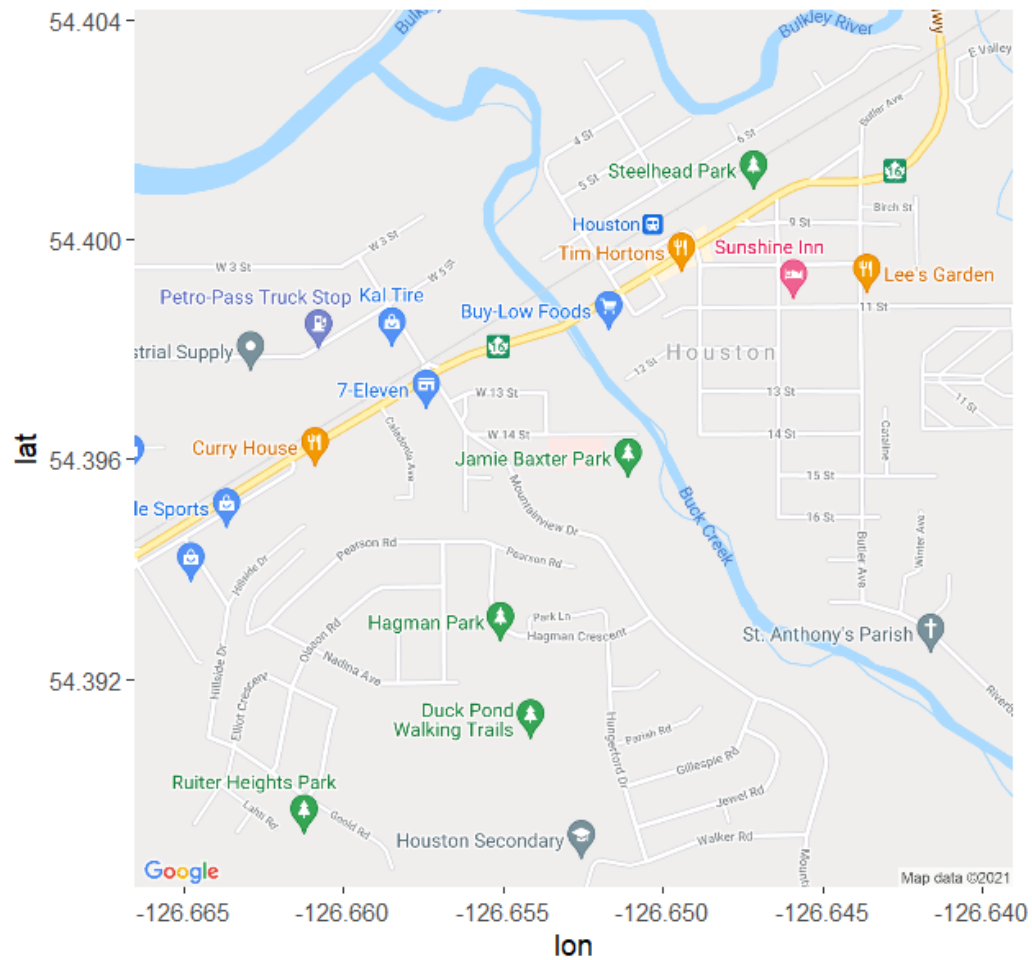

Figure 1: Houston Health Centre - 3202 14 St, Houston, BC V0J 1Z0 - 250-845-2294

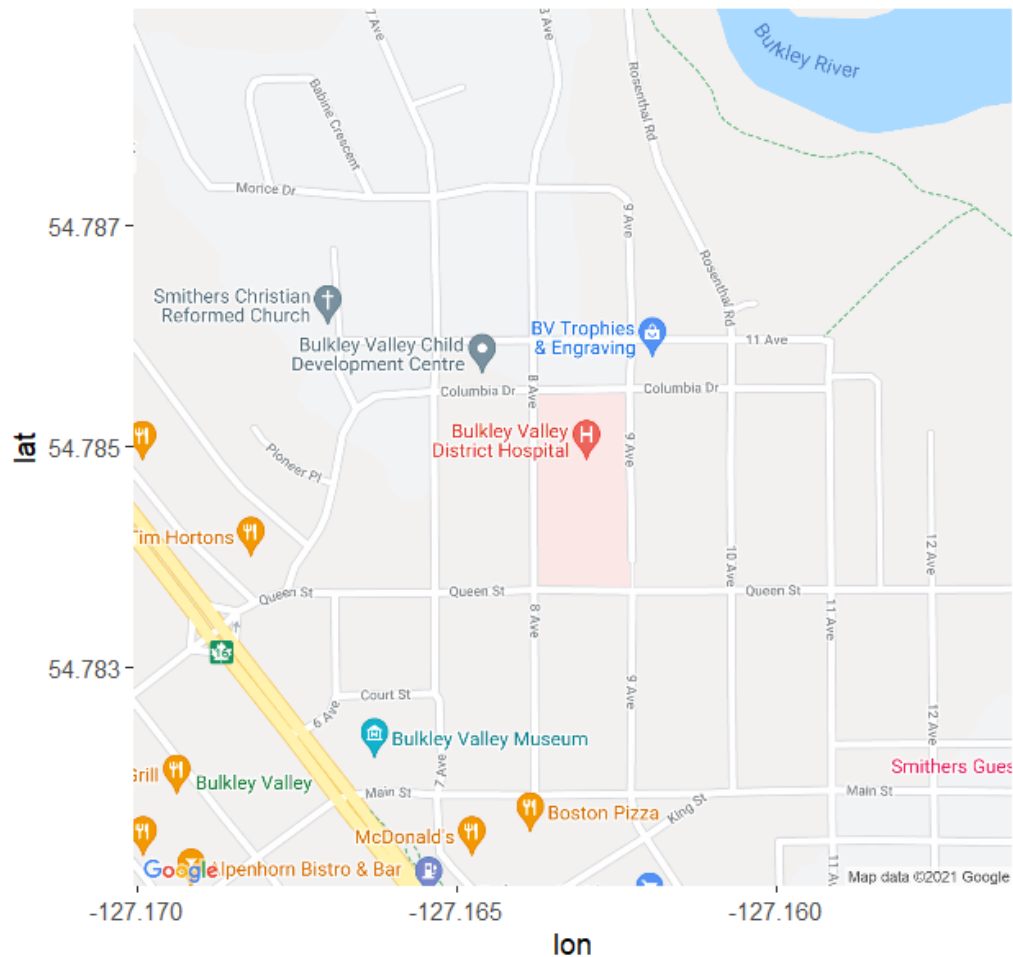

Figure 2: (Smithers) Bulkley Valley District Hospital - 3950 8 Ave, Smithers, BC V0J 2N0 - 250-847-2611

Field Plan

Field work methods will result in products feeding reporting formats such as the [2020 deliverables](#) and will generally follow procedures in:

- [fish passage assessments](#)
- [habitat confirmations](#)

Presence/absence of fish, species composition/density and distribution limits can be useful for prioritizing which crossings are a best fit for fish passage restoration and help inform follow up

monitoring so electrofishing and minnowtrapping may be conducted. Standard Fish and Fish Habitat Inventory Standard Field Form [site cards](#) are used to gather habitat data.

A summary of sites to be potentially assessed is included as Table [2](#) and an overview map of displaying potential sample locations is included as Figure 1.

Check In Procedures

Call, text or inreach Tara Stark (2505059854) each morning to share the plan for the day (i.e. name of roads and sites). Check in time is before 7 pm each evening although we regularly check in throughout the day (ex. at arrival to site, 1pm and 4pm) on the inreach or by text and report position/provide updates.

Procedures for Failed Check-In - for Check in person

Procedures are summarized in the following Figure. If phone call or inReach check-in is not received by 7pm send text to inreach units, call or text cell phones of field crew members. If no response please call accommodations then personal emergency contacts to see if they have heard anything. Wait 1 hour and text inreach, text or call cell phones and personal emergency contacts and accommodations again. Repeat after 2 hours (9 pm) - if no response then notify the RCMP of a missing persons in field.

Figure 3: Procedures for failed check-in

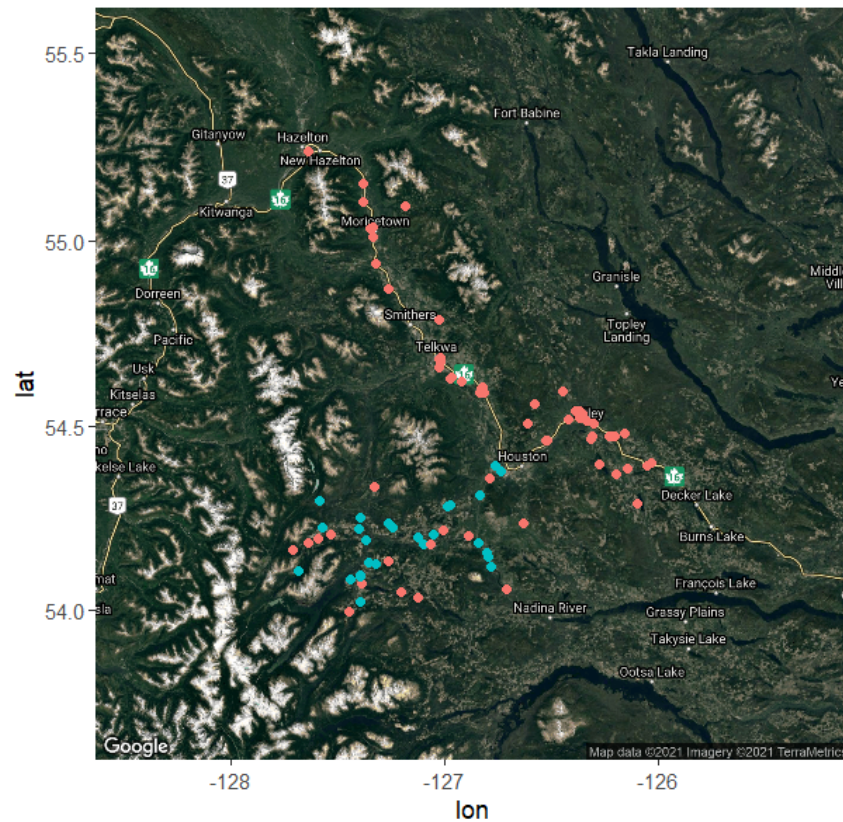

Figure 1. Map of potential sampling areas. High priority sites in red and moderate priority in green.

Table 2: Potential sample locations in the Bulkley River and Morice River watershed groups.

1014000009	–	646923.3	6028170	morice	093L.109	In Houston with rail upstream. Maybe very modified.	{RB}
1014000255	Nado Creek	613441.0	5999564	morice	093L.102	CBR - 2.2m culvert.	–
1014000271	–	644993.9	6029521	morice	093L.109	Just below Klinger Lake.	

Good for coho? {EB,RB}

1014000312	–	602253.5	5994059	morice	093L.102	Smaller stream potentially suitable for upstream migrating juvenile salmon. DV upstream.	{DV}
1014000379	–	604834.9	6012766	morice	093L.107	Cascade noted adjacent to crossing but no FISS sample sites. Coho in mainstem Thautil nearby. Stream splits to two tribs just upstream.	–
1014000507	–	593237.3	6009679	morice	093L.107	Low gradient with wetlands upstream and CO,CT and others downstream.	–
1014000509	–	609917.9	5998826	morice	093L.102	Channel width 1.5 m downstream at FISS site.	–
1014000565	–	608574.3	6022389	morice	093L.107	Stealhead and bulltrout nearby	–
1014000569	–	631242.7	6016700	morice	093L.108	FISS site downstream does not mention intermittent as is FWA tag.	–
1014000571	–	631704.2	6017415	morice	093L.108	Lots of low gradient habitat but split into many tribs.	{DV,RB}
1014000674	–	622270.8	6007312	morice	093L.103	Coho downstream.	–
1014000683	–	627065.0	6008380	morice	093L.108	Top end of lake.	–
1014000718	–	643882.0	6002088	morice	093L.104	Models as over 2m wide and has fish obs upstream.	{DV,RB}
1014000777	–	605157.0	5994783	morice	093L.102	Two small tribs upstream.	–
1014000788	–	604940.0	5995120	morice	093L.102	Steeper system.	–
1014000796	Fenton Creek	637544.0	6008011	morice	093L.108	Major culvert (5m wide).	{CC,CO,DV,RB,SP}
1014000798	Peacock Creek	643460.3	6025890	morice	093L.109	Fish way noted as having issues in Smith 2018.	–
1014000801	–	640778.1	6020795	morice	093L.108	Quite steep.	–
1014000908	–	604357.3	6009291	morice	093L.107	Steelhead and coho points just downstream.	–
1014000912	–	584302.5	6002385	morice	093L.101	Good sized lake upstream. Road not visible in aerial imagery. Follow up with foresters before heading out in field.	{DV,RB}
1014000931	–	601878.2	5984146	morice	093E.122	Very close to Naninka.	{CT,DV}
1014000991	–	623923.0	6005104	morice	093L.103	Steeper stream.	–

1014001002	–	606615.0	6006104	morice	093L.102	Smaller stream with coho upstream of crossing.	{CO}
1014001029	–	626238.6	6005131	morice	093L.103	Very close to Morice mainstem.	{CT,RB}
1014001080	–	605331.0	5986992	morice	093L.102	Smaller potential high value habitat gain but Nanika in Nanika system so in high value watershed.	{CT}
1014001161	McBride Creek	605511.0	5992667	morice	093L.102	CBR indicates "major culvert" at 4.5m width.	{BB,CAS,CO,CSU,CT,DV,LDC,LSU,LT,LW,MW,PCC,RB,RSC,WSU}
1014001195	–	607542.6	5999130	morice	093L.102	Low gradient and close to mainstem but low elevation watershed.	–
1014001198	–	585968.3	5996331	morice	093L.101	Models as a bit larger of a channel with 0.75km <5% and DV upstream.	{DV}
1014001222	Lamprey Creek	617661.2	5990287	morice	093L.102	Large lake headed system.	{CT,DV,LKC,RB,RB/CT}
1014001245	–	588941.5	6004786	morice	093L.101	Coho, steelhead and other species upstream.	{CO,CT,DV,LKC,SP}
1014001247	–	591802.9	6006187	morice	093L.102	Multiple species (including CO) noted upstream with lots of modelled habitat.	{CO,CT,DV,LKC}
1014001427	–	613053.0	6011398	morice	093L.107	Potentially fish bearing according to http://a100.gov.bc.ca/pub/acat/public/viewReport.do?reportId=50411 .	–
1014001534	–	592004.9	6017653	morice	093L.107	Channel models as small. Flows into lake.	–
1014001542	–	595641.5	6007685	morice	093L.107	Many fish points upstream and downstream. Low grades.	{CT,DV}
1014001563	–	630001.2	6009752	morice	093L.108	Lots of low gradient and lake upstream.	{CCT,CT,LKC}
1014001769	–	614711.5	6009971	morice	093L.107	Appears of highest value for rearing.	{CT}
1024704566	Corya Creek	605785.6	6099884	cwf	093M.102	–	{DV,RB}

1024740003 – 622870.2 5988875 morice 093L.103 Lots of lake upstream. {CAL,LKC,RB,RSC}

Field Plan

Field work methods will result in products feeding reporting formats such as the [2020 deliverables](#) and will generally follow procedures in:

- [fish passage assessments](#) (MoE 2011)
- [habitat confirmations](#) (Fish Passage Technical Working Group 2011).

Presence/absence of fish, species composition/density and distribution limits can be useful for prioritizing which crossings are a best fit for fish passage restoration and help inform follow up

monitoring so electrofishing and minnowtrapping may be conducted. Standard Fish and Fish Habitat Inventory Standard Field Form [site cards](#) are used to gather habitat data.

A summary of sites to be potentially assessed is included as Table [2](#) and an overview map of displaying potential sample locations is included as Figure 1.

Check In Procedures

Call, text or inreach Tara Stark (2505059854) each morning to share the plan for the day (i.e. name of roads and sites). Check in time is before 7 pm each evening although we regularly check in throughout the day (ex. at arrival to site, 1pm and 4pm) on the inreach or by text and report position/provide updates.

Procedures for Failed Check-In - for Check in person

Procedures are summarized in the following Figure. If phone call or inReach check-in is not received by 7pm send text to inreach units, call or text cell phones of field crew members. If no response please call accommodations then personal emergency contacts to see if they have heard anything. Wait 1 hour and text inreach, text or call cell phones and personal emergency contacts and accomodations again. Repeat after 2 hours (9 pm) - if no response then notify the RCMP of a missing persons in field.

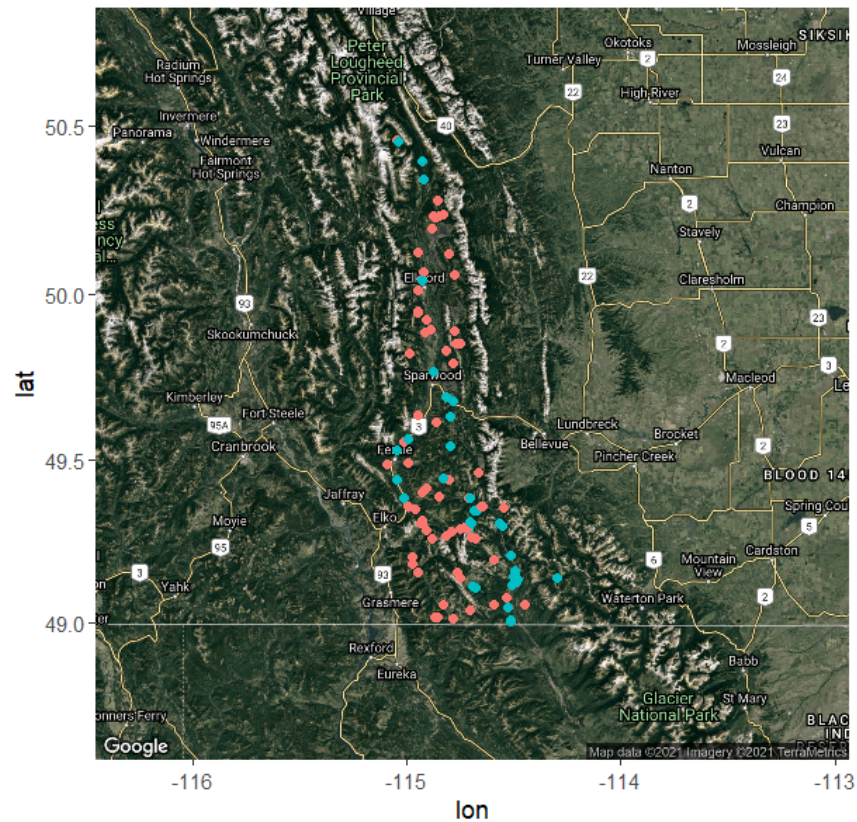

Figure 1. Map of potential sampling areas. High priority sites in red and moderate priority in green.

Table 2: CWF - Potential sample locations.

Table 3: 2020_field_planning - Potential sample locations.

id_xing	Stream	east	north	source	id_map	comments	sp_upstr
50060	Harvey Creek	666579.3	5461445	2020_planning	082G.109	Harvey Lake is 1ha lake upstream ~230m upstream of the crossing.	—
50061	Fuel Creek	667651.2	5459223	2020_planning	082G.109	Large stream but dry during assessment. WCT known	

upstream and wetted at 50151

{WCT}

(ford) located 600m upstream.

50063	Kisoo Creek	668960.5	5458806	2020_planning	082G.109	Relatively large channel width. Good flow and hab value rated high.	–
50072	–	682784.9	5447731	2020_planning	082G.104	Small stream with good flow in photos. Assessment comments indicate good gravels. Very close to the mainstem of the Flathead.	–
50073	–	682180.0	5446356	2020_planning	082G.104	Fairly steep. comments indicate "WCT found upstream by Artech in 1995 according to Habitat Wizard"	–
50075	–	683797.4	5445297	2020_planning	082G.104	Smaller stream.	–
50081	–	681879.8	5443723	2020_planning	082G.104	Large stream. Potential barrier.	–
50084	–	680147.4	5439436	2020_planning	082G.104	Fish observed at outlet. Falls in FISS just downstream. Culvert appears passable to all life stages/species at time of survey but may be velocity barrier at higher flows.	–
50085	–	680488.4	5435930	2020_planning	082G.104	Larger channel width habitat rated as high value.	–
50086	–	680428.7	5435744	2020_planning	082G.104	Appears passable at most flows. Rocky mountain sculpin nearby and their swim speeds could be a consideration.	–
50090	–	681743.0	5430951	2020_planning	082G.104	If this is the mainstem, habitat upstream at bridge appears mod to high value.	–
50091	–	681610.6	5431531	2020_planning	082G.104	Good flow in photos. Smaller channel width. Not on mapped stream location	–
50100	–	669510.1	5442206	2020_planning	082G.104	Larger stream but fairly steep with relatively low habitat gain potential.	–
50101	–	669469.8	5442312	2020_planning	082G.104	Larger stream with good flow. Gradients model as >15 downstream so naturally occurring barriers are fairly likely.	–

50102	–	668217.8	5442479	2020_planning	082G.104	Good flow but very steep then extremely steep upstream.	–
50152	–	638002.9	5483401	2020_field	082G.113	–	–
50181	–	648276.6	5468171	2020_field	082G.108	–	–
50185	–	645679.3	5469020	2020_field	082G.108	–	–
50240	–	659199.0	5499658	2020_planning	082G.119	Comments indicate partially embedded and backwatered. Other comments indicate good candidate for bridge.	–
50261	–	669029.6	5481120	2020_field	082G.114	–	–
50273	Robert Creek	657671.1	5506277	2020_planning	082G.118	Dry channel. Small stream.	–
62120	–	676693.1	5464482	2020_planning	082G.109	Small potential habitat gain but assessment comments indicate good rearing habitat and good potential fix candidate.	–
62265	–	647692.6	5578674	2020_planning	082J.108	Splits upstream and gets very steep. Grainger indicates "Good potential for fix. Rearing habitat upstream."	–
62423	Grave Creek	660493.7	5524263	2020_field	082G.124	–	{RB,WCT}
62425	Grave Creek	661478.0	5524388	2020_field	082G.124	–	{WCT}
62426	Grave Creek	661662.7	5524440	2020_field	082G.124	–	{WCT}
197533	Brûlé Creek	651625.5	5528887	2020_field	082G.123	–	{BT,DV,RB,WCT}
197534	Weigert Creek	650147.8	5532049	2020_field	082G.123	–	–
197542	Hartley Creek	643536.7	5490723	2020_field	082G.113	–	{DV,EB,WCT}
197555	–	646737.2	5554528	2020_field	082J.103	–	–
197559	Brûlé Creek	651512.4	5528837	2020_field	082G.123	–	{RB,WCT}
1004600156	–	641368.8	5487802	2020_planning	082G.113	Industrial area with stream splitting 3 ways just upstream.	{EB,LSU,SP,WCT}
1004600264	–	666528.9	5472653	2020_planning	082G.109	WCT upstream with modelled low gradient habitat. Smaller watershed though.	{WCT}
1004600267	–	666187.7	5472563	2020_planning	082G.109	Mottled Sculpin upstream.	{BT,CBA}
1004600621	Quail Creek	645057.0	5492118	2020_planning	082G.113	Private agricultural land. Very low gradient so suspect passable at most flows.	–
1004601149	–	659817.1	5528849	2020_planning	082G.124	WCT upstream.	{WCT}

1004601582	–	641508.0	5477910	2020_planning	082G.113	Stream splits with numerous crossings upstream.	–
1004601687	–	670843.0	5469802	2020_planning	082G.109	Large amount of lower grade habitat modelled upstream. Survey site from Kokanee 2001 (http://a100.gov.bc.ca/pub/acat/public/viewReport.do?reportId=29) upstream 600m.	–
1004602098	–	657221.1	5479085	2020_planning	082G.113	Crossing appears to be likely located 40m to north-east. Interior Reforestation sample site just upstream. No ecocat report link.	–
1004602218	–	654343.0	5497892	2020_planning	082G.118	Large amount of potential habitat but suspect deactivated road. Review before surveying.	{WCT}
1004602564	–	667163.0	5464077	2020_planning	082G.109	Steeper habitat upstream.	–
1004602620	–	680897.0	5453543	2020_planning	082G.109	Kokanee 2001 (http://a100.gov.bc.ca/pub/acat/public/viewReport.do?reportId=29) report resident fish population does not have access to Flathead river at FISS site downstream.	–
1004602726	Flanders Brook	697247.9	5446252	2020_planning	082G.105	Seems like road may be deactivated in aerial imagery. Recommend checking with local foresters.	–
1004602869	Couldrey Creek	667844.0	5434398	2020_planning	082G.104	Suspect deactivation from review of aerial imagery. Large potential habitat gain.	–
1004603040	–	648387.0	5545039	2020_planning	082J.103	Private land.	{EB,WCT}
1004603477	Burnham Creek	675878.1	5436608	2020_planning	082G.104	Large watershed with WCT know upstream. Good candidate.	{WCT}
1004603597	–	675469.0	5451829	2020_planning	082G.104	Step-pool system. Relatively larger watershed. BT close by.	–
1004603725	Pollock Creek	678149.9	5469459	2020_planning	082G.109	Large stream.	{BT,WCT}
1004603904	–	668900.0	5468357	2020_planning	082G.109	Decent amount of habitat upstream in 5-8% slope class. Road may be overgrown and/or deactivated by	–

appearance of google

–

satellite imagery.

1004603908	McLatchie Creek	667049.0	5464485	2020_planning	082G.109	Steeper habitat upstream.	–
1004604006	Gardner Creek	647065.1	5584911	2020_planning	082J.108	Primarily wetland type habitat upstream.	{BSU,BT,DV,LSU,MW,WCT}
1004605451	Nettie Creek	686581.3	5436976	2020_planning	082G.104	Phase 1 required. WCT known upstream. Connected to Proctor Lake which has recorded RB. Large potential habitat gain.	{CC,WCT}
1004605458	–	686473.0	5437250	2020_planning	082G.104	First order watershed.	–
1004606501	–	668124.2	5468514	2020_planning	082G.109	Steeper stream.	–
1004606506	–	670699.0	5469925	2020_planning	082G.109	Extensive low gradient and wetland habitat upstream.	–
1004606597	–	683097.0	5444416	2020_planning	082G.104	Stream splits to multiple channels just upstream with relatively small - low elevation watershed.	–
1004606751	Whiting Creek	652940.4	5515013	2020_planning	082G.118	Railway. Appears potentially backwatered.	–
1004606800	–	644278.7	5471741	2020_planning	082G.108	Large railway crossing structures in aerial photo. Suspect passable.	–
1004606821	Erickson Creek	659887.7	5505156	2020_planning	082G.119	Immediately adjacent to mine	{BT,DV,EB,WCT}
1004607003	–	659238.0	5489723	2020_planning	082G.114	Appears to be PSCIS 50225.	–
1004607273	Packhorse Creek	677870.1	5463568	2020_planning	082G.109	Road looks overgrown in aerial imagery. Suspect ford.	{WCT}
1004607406	–	659304.0	5478557	2020_planning	082G.113	WCT upsstream. Large habitat gain before next potential barrier.	{WCT}
1004607464	–	682774.0	5448438	2020_planning	082G.104	Culvert documented in	

FISS. Survey sites upstream of
crossing.

{WCT}

1004607567	—	655995.0	5472834	2020_planning	082G.108	Fish upstream and down.	{TR}
------------	---	----------	---------	---------------	----------	-------------------------	------

Also - this is email from Betty

1. Crossing Creek has been removed from the habitat confirmation list due to low quality habitat.
2. Brule Creek 1024734790 has been verified to not exist and has been removed from the list.
3. PSCIS crossings 62181 and 62182 on Dry Creek have been added for reassessment. These have had a habitat confirmation, but at the time the crossing was embedded and considered to be likely passable. This was 9 years ago, so they need to be reassessed.
4. Hartley Creek dam immediately upstream of PSCIS crossing 197542 has been added to the list. Requires assessment to determine passability by fish; however, a habitat confirmation has already been completed on the road crossing immediately downstream, so no habitat confirmation required.
5. Dam 2606 remains on the list. This dam is likely not impeding fish passage, as it was supposedly built as a side channel that has since filled in and become disconnected from the main channel. Just need to verify that this is the case.

SCHEDULE A – LIST OF BARRIERS FOR ASSESSMENT

Table 1. Barrier assessment locations and description.

aggregated_crossings_id	modelled_crossing_id	Waterbody	Road Surface Type	Zone 11 Easting	Northing	Comments
1024735443	24735443	Abruzzi Creek	rough	5591423	638867	
1004603480	4603480	Bean Creek	loose	5464640	650539	
1004606347	4606347	Bean Creek	loose	5463819	650415	
1004605499	4605499	Trib to Bean Creek	paved	5463543	650057	
1004603553	4603553	Bighorn Creek	loose	5447429	663230	Probably deactivated but not certain
1004606926	4606926	Bighorn Creek	rough	5445241	664112	
1004600533	4600533	Chauncey Creek	rough	5554160	656890	
61504	24706507	Coal Creek	loose	5483687	645313	Previously assessed in PSCIS (ID 61504). Needs reassessment. comments from PSCIS: "Old concrete from old bridge in streambed. Creates somewhat of a barrier." Reassess for pass-ability using professional judgment/analysis, since it doesn't fit the provincial protocol.
1004606545	4606545	Cummings Creek	loose	5520738	644862	
62181	62181	Dry Creek	Rail	656409	5544755	Habitat confirmations completed by Masse in 2013 (PSCIS ID 62181) but culverts scored as passable. Reassess now that culverts have aged.
62182	62182	Dry Creek	Paved	656391	5544771	Habitat confirmations completed by Masse in 2013 (PSCIS ID 62182) but culverts scored as passable. Reassess now that culverts have aged.
1004600762	4600762	Fording River	loose	5562574	651282
